

About This Game

In space no one can hear you KREEP...

Operation KREEP is a two-dimensional top-down couch co-op (hot-seat) multiplayer action game. An extraterrestrial organism threatens deep space exploration missions! Only trained personnel working as a team can eliminate these infestations. But, the corporation financing the space endeavor has a private mail for you:

Cold hard cash for the alien alive!

Which side will you choose?

Features:

- Engage in a frantic local multiplayer action game (offline 1-4)
- Play single player matches against AI agents
- Fight in a dozen of arenas and pick from multiple player skins
- Try out various game rule mutators to take part in hilarious matches
- Decide, with or against your friends?!
- Both keyboard and controller support

System Requirements

Minimum:

- **OS:** Windows XP / Vista / 7 / 8 / 10
- **Processor:** 2.0 Ghz
- **Memory:** 1024 MB RAM
- **Graphics:** DirectX compatible graphics card
- **DirectX:** Version 9.0c
- **Storage:** 60 MB available space
- **Sound Card:** DirectX compatible sound card

Controller support

The game supports up to four XInput devices (e.g.: the Xbox 360 controller).

If your controller(s) does not happen to be in this category check:

<http://www.x360ce.com>

The controller emulator is easy to set up and works perfectly with Kleep!

Contact

My name is Tamás Karsai (Spidi) forming „*Magic Item Tech*”. If you have any feedback or problems to report, you can reach me at: spidi@magicitemtech.com

Please put „KREEP” into the subject field of the mail if you write!

Plus, you can read news on my website:

<https://magicitemtech.com/>

Troubleshoot

If the game does not start or unexpectedly crashes, you can help me fix the error by following these steps:

1. Enter the directory of the game.
This will be a directory named „KREEP” under the installation folder of your Steam apps. (the default path is: Program Files (x86)\Steam\steamapps\common)
2. Check for „txt” files with the following pattern as their name:
KREEP_log_yyyy-MM-dd_HH-mm-ss.txt
3. Freely check their content, no user data is captured, only executional problems printed by the game software.
4. Mail these files to me.

If anything like this occurs, please forgive me for the inconvenience, I do my best to fix the errors and push an update to Steam as soon as possible!
