Controller troubleshooting

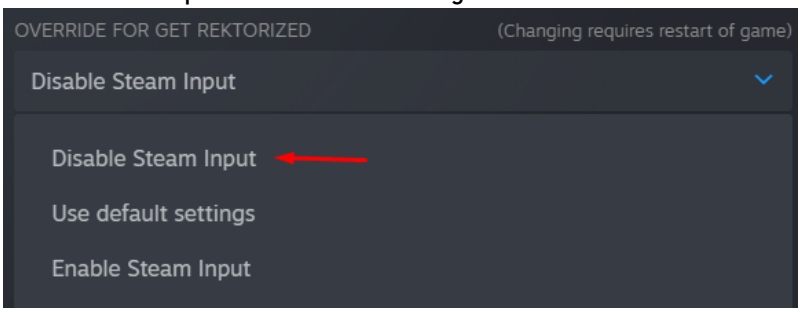

In case that your PlayStation or Xbox Controller is not recognized correctly by the game, please quit the game and open Steam. Navigate to the game in your Steam Library, right-click it and select Properties...:

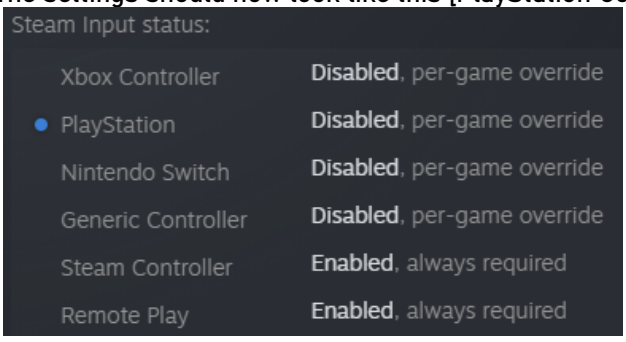

A new window will pop up. On the left panel, choose CONTROLLER:

Click on the drop down menu on the right and choose Disable Steam Input:

The settings should now look like this [PlayStation Controller as example]:

Now restart your Steam Client or reboot your computer.
Your controller should now be recognized by the game!
